

# Road and Paths

## Any further comments you have on Roads and Paths?

---

All roads to be adopted by the council, i.e. Croft Road etc

---

Many paths with bad holes in to fall over and no or poor lighting

---

Speed limit of 20MPH should only apply in Town Centre

---

Too Many potholes

---

The current speed limits are excellent if adhered to. It would help if shopkeepers volunteered to clear their frontage.  
There is a good network of paths

---

Fill in pot holes

---

as stated above

---

2d - shop keepers pay enough in rates etc without being responsible for road sweeping

---

Item 2e - community wardens could note on their rounds

---

most need a good tidy up

---

Dog fouling regulations should be enforced

---

Enforce dog fouling and parking penalties. Pot Holes

---

it is difficult for the elderly to keep gardens in good condition

---

cycle paths and improvements to cracked pavements

---

state of some roads and footpaths are appalling

---

They are poorly maintained, rarely swept

---

poorly maintained, too many holes and too many areas of both flooded too easily - particularly High Street pavement by the burger bar and Budgens car park. Serious drainage problems

---

bad potholes in the High Street near Sessions House and in East Street. Terrible for bike users. Also Manor Road from the Joy to the new flats (eastpoint) the road is very uneven just where a bike goes

---

Centre of the roads are breaking up and holes are appearing everywhere

---

please set a 20MPH limit W.E.F the wave so there can be no excuse for crazy behaviour seen on Kingsway, Constable Drive East Beach Car Park

---

Better repair work would be appreciated. I think there should be stricter attention on road speed

---

amount paid by taxation by all means improvement to be made

---

introduction of more dog waste bins to individual estates. Irresponsible dog owners drop polythene bags of dog waste on footpaths e.g. old farm road access to spinney close.

---

we need traffic wardens to stop cars parking on double yellow lines in High Street. It blocks the road and causes traffic jams

---

the road is not adequate for the amount of traffic in Selsey due to amount of new housing being built

---

paths and roads full of pot holes. Total replacing necessary

---

20 MPH speed limit at schools and in housing estates. If householders fail to keep hedges trimmed - warn them then charge them

---

pavements to much of an angle. Slope for the elderly

---

On a general basis our roads are a disgrace, still pot holes everywhere, out of level plane in roads such as Lingfield, paths are also a disgrace, buses bounce down Merryfield Drive, roads everywhere, road needs to be completely resurfaced it's a disgrace - buses need to slow down - our properties shake at times in Merryfield

---

The Bill end of Green Lane verges are overgrown

---

there are lengths of road where pedestrians are forced to walk on the road. This can mean deaths at night

---

cycle path along the B2145 and in Selsey

---

either more rubbish bins on the High Street (near the rock shop) or more road sweeping over the weekend

---

the lorries seem to be getting bigger. The B2145 is not suitable for them

---

most side roads are uneven and holed, some are dangerous to walkers

## Any further comments you have on Roads and Paths?

shops should not clutter pavements with A-boards as it makes it difficult to pass people or trying to get up to pavement when crossing side roads. East Beach one way and East Street pavements overgrown. When drains on pavements have been cleaned or repaired they lay black cement which is higher than the drains. Persons with bad eyesight could well trip over this bad workmanship. There are quite a few drops needs seeing to help buggy, wheelchair owners to cross side and main roads.  
fill in cracks and potholes on all roads and paths

more road sweeping

side roads full of pot holes, more dog poo bins on public footpaths and roads, especially side roads

paths in side roads very bad (please check out my paths (Glen Crescent) especially round bungalows where the elderly live  
some paths in Selsey need re-surfacing

pot holes everywhere. Beach Road dreadful. A danger to cyclists and invalid buggies. Pavements a disgrace especially Beach Road. Parking on grass verges especially Beach Road where householders have not paid for dropped curbs

Pot holes everywhere, danger to cyclists and invalid buggies. Beach Road tarmac pavement is a disgrace. Parking on grass verge causes a muddy quagmire where householders have not installed drop kerbs

have no comment on 2d & 2e

the green verge outside the One Stop shop in the High Street is an eye sore because vans / lorries park on it. The paving slabs on the shop side are cracked and dangerous

house holders should be made to sweep up shingle that comes from there drives

walking from Lloyds to Boots chemists or vice versa very uneven pavement

the paths are in a very bad state and as an elderly person I find it difficult to walk outside - I feel safer in the road.

Needs island in road @ St Peters Crescent end of High Street. There is no zebra crossing there and I've nearly been killed with speeding traffic. The lower end of the High Street (St Peters Cres / White Horse Bunns Pk.) No where to cross the road, cars come from and to the Chichester road at full speed. Children, elderly and others cannot get across the road without fear of being injured

Park Lane to be 'Made up'

weekly check for and filling of potholes in roads. Make School Lane one-way

no road sweeper into our cul-de-sac Harcourt Way. I've spoken to Mr Hodd Highways several times. Paths uneven and dangerous especially round East Beach shops

road making on B2145 are poor, cats eyes needed on central white line. Roads outside schools (East St / High St) need traffic calming schemes such as speed humps, camera

cycle track all the way from Selsey to Chichester, also path

paths are uneven and dangerous to wheelchair users, people with invalid motors, mums with prams and for elderly pedestrians

increasing potholes in roads to be filled in

poor road markings / signs at junctions in Selsey

The footpath between Horsefield Road and Paddock Lane should be swept more frequently. I usually clear the weeds and clear it - in fact I've never seen it being cleared by anyone other than me

2e - many paths 50% obstructed. Require more maintenance; cash resource should target 'basics'

complete lack of maintenance over last few years

more maintenance

there are a number of potholes in Selsey which should be repaired

dog walkers should be prosecuted for allowing their dogs to foul paths and not cleaning up after

get rid of dogs

pot holes and road repair need to be sorted

road full of potholes esp West Street near shops. Pavements very poor, wall being destroyed in same place

2d - they pay rent so really council should also sweep pavements daily; 2e - It is very upsetting for disabled and able pedestrians; 2f - too many heavy lorries, sadly we all know from where and why! Too little money spent by WSCC!!

side roads EG Grafton have frequent and deep pot holes. People double park in East Street when dropping off . Picking up school children \* see note in 3j

## Any further comments you have on Roads and Paths?

I think some improvement could be carried out at the junction of Church Road and Manor Road i.e. improved lighting and signage as this junction is probably the busiest junction in Selsey, following all the recent house building

2d - it is in their own interest to promote trade

pavements in Constable Drive and Marine Drive area are awkward for wheelchairs etc - so uneven. Cracks in Marine Drive are slowly widening - one has been in the road for 15 years - I should know - I live opposite it

heavy lorries loading outside Manhood merchants at peak times cause traffic hold-ups. The traffic lights outside Budgens are unnecessary and cause backups right past school lane. Add these two together and some mornings there is traffic chaos

The condition of most inner roads in Selsey are a disgrace and left to deteriorate over the years

about time the pot holes in the roads were filled in

town roads should be kept in better conditions. Pot holes etc should be repaired more often

what's the point of fixing holes which must cost the earth / why not do them properly

ban tractors during peak traffic flow on B2145. Also dustbin collection on that road should be in off peak

2c - would support 30mph. 2f - the roads and pavements in areas in Selsey are an absolute disgrace, especially the bus route - East Street, Merryfield and Constable Drive and Beach Road

2c - why? 2d - good idea but they won't do it. 2f - roads not swept often enough. Fines for dog fouling footpaths

there are too many pot holes in roads and pavements and stop cars parking on the High Street especially taxis.

lot of pot holes at junction of Manor Road and Beach Road, and need lights to cross these as its terrible to try to cross over. Fill in pot holes.

restrict in full cycling on paths and sea wall

mobility vehicles kept on road not pavement. Restrict speed to 3 - 5 mph. These driver are becoming a menace

2e is a sensitive issue as hedges are important for environmental issues and there must be some elderly people in Selsey who cannot afford gardeners to have their hedges cut back

mend pot holes. Keep foot paths proper width

paths should be kept from pot holes so we do not fall over

not very well maintained. Not enough dropped kerbs too much parking on pavement

paths need re-doing

road in Selsey are full of potholes, Constable Drive, Merryfield Road, Manor Road (north), Albion Road. All dangerous for cyclists and smaller cars

very poorly kept up considering council tax

repair existing side roads and paths re potholes

2c - from where to end where? 2d - Insurance implications? Who pays? 2e - Highways

it would be nice if dog owners would use bins provided and not discard waste in plastic bags in hedges

2c - you will need the police to enforce it as the yobs who drive like madness now need to be stopped. 2f - speed cameras and police to control the mad yobs element drivers - we all know who they are (the silver fiat, the black VW) why do the police do nothing about them

if we choose to live in Selsey we must tolerate the rural use of B2145

more checks on alleyways even though there are notices they are still full of dogs mess. I am a dog lover but find the mess offensive

mend potholes

High Street could be bricked over - better for pedestrians. Car park at East Street only for cars - not vans or lorries

not to have fences on boundaries on open planned properties

why cant the services get together when digging up the road, instead of doing the same bit over and over

no parking up on grass verges plus caravans should not be parked on driveway or front garden

very poor for anyone with walking aids

get rid of the traffic lights at Budgens

potholes should receive more prompt attention certain roads get regular 'flood spots' e.g. junction Manor Road / Church Road. Nothing is done to prevent them

## Any further comments you have on Roads and Paths?

the amount of time the councils use, especially on the side roads is a disgrace. When are these side roads going to be properly maintained. The dirt and the holes are unbelievable

Sea wall cleared of pebbles more often. B2145 paved to a higher standard i.e. as A road such as the Wittering road which has less traffic and considerably less large heavy vehicles. Road works to be completed in far less time by using more workers with a supervisor to ensure they get on with the job. Financial penalties if they fail to complete on time.

a greater check on speedsters and East Beach shop are of parking should be improved

the footpaths are generally in a disgusting state of repair

Road in Selsey need checking regularly for pot holes, particularly round East Beach area

foot paths kept cut back in summer particularly where stinging nettles grow

pot holes need to be kept to a minimum

all potholes repaired on all roads

pot holes in road. East Beach Road patched but back in place really really quickly. Some of the footpaths with weeds , dog muck are disgusting

more people enforcing fines for dog mess on paths

European lorries going to fish factory on East Beach to slow down, also drivers to Natures Way need clear directions. Many stop to go in at old entrance and have to turn at roundabout (Manor Road), clipping kerb etc and not thinking of pedestrians and other road users

speed ramps on roads like Kingsway, Constable Drive, Manor Road / Grafton Road

on B2145 maintain road edges. Stop all parking on footpaths (2 wheels + 4)

not enough white lines on roads

too many pot holes

perhaps community wardens could walk the roads and see all the paths obstructed by hedges and also many cars parked on the pavements and many with no road tax

2c - far better to enforce existing limits

2c - 30 mph yes

I live in East Street and believe that it will take a child being injured coming out of school to slow people down. I would therefore urge for there to be the introduction of speed bumps outside the school

several pot holes need filling. Could be fatal to bikes

no parking in the High Street, except deliveries. Speed bumps on Mill Lane - road to caravan park

A lot of the roads in Selsey Town, major side roads off the High Street, especially Merryfield Drive have major potholes

less dirt on main roads. From tractors. Should be made to clean up

Litter free please

too many cars parked on footpaths. Give them a 'ticket'

problems with crossing Manor Road, especially Beach & Church Rd "corner" very dangerous crossing at the corner, cars rush around, I nearly got knocked over. 'Blind' crossings are not placed in safe corners. Need crossings e.g. Mountwood and Manor Road - vans etc parked on Manor Road too, obscuring oncoming traffic

Since Manor Road has become a direct route out of Selsey it takes ages to wait for a safe crossing for elderly and children. The vans and cars parked outside houses in Manor Road, obstructs the view to oncoming traffic. To say nothing of cars sweeping round from Church Road etc

potholes

2e - if they are able

road maintenance is terrible

During the heavy rains the paths that are very narrow near the top end of East Street and myself and my wife were soaked by traffic that hit holes where water had lain. We complained to the building firm, who did apologise but we still had to go home and change

a 20mph limit overall is not realistic but East Beach Road should have a limit and parking outside of the shops is a problem for cars reversing out and for pedestrians as well. Some cars race past without a care. Re hedges, I have to contact Highways & Byways every year because of the hedge at no 2 East Bank. Its 5 foot high and never trimmed, also brambles poke through at eye level. What happened to the rule open plan which the rest of us abide to?

## Any further comments you have on Roads and Paths?

2d - should be in addition to the councils street cleaning

pavement generally poor

more litter collection and dog mess clearing

All Selsey roads are in poor state of repair and need resurfacing and paths

better maintenance of flagstone paths Seal Road and adjoining roads need re-surfacing

as a pedestrian stop cars parking on pavements and mobile buggies should use the road

The potholes, even on council adopted roads are horrendous. Manor Road, now a major route into the town is exceptionally bad

the rough area of trees / bushes between the lifeboat station + fish farm next to Kingsway sign should be removed and grassed so as to upgrade appearance

restrictions on size of vehicles as roads too narrow to cope with them - dangerous

all pavements need redoing, another road into Selsey would be sensible probably from roundabout at the north end or Manor Road

very poor around Selsey

the unadopted roads in Selsey are a disgrace. In particular Latham Road is dangerous with no footpath and no lights. An accident waiting to happen

potholes regularly filled in

the weed in the gutter and foot paths should be sprayed

Bad siting of drainage causes very poor surface water, although when I complained of water outside of no 16 it was quickly repaired thank you.

poor maintenance

2c - maybe 30mph. 2f - Poor!

they are a disgrace

Manor road should have a 20 mph speed limit. It's nickname is currently the Selsey M4. Grafton Road should also have 20mph limit. Clear on-street parking in St.Peter's Crescent - this is a safety issue as parked cars create a single lane for 2 way traffic and the bend prevents a clear view. Do not put in sleeping policemen

enforce existing speed limits

fill in pot holes. A new road sign for Glen Crescent

the paths need ongoing repair

maintenance on our roads should be a lot better and there should provision for bicycle paths. Both need attention

both need attention

the junction at the Fisherman's Joy should be changed back to allow East Street traffic right of way - it is impossible to see down Manor Road when you are turning to pull out from Albion Road

urgent need to upgrade footpath paving as uneven in many places and dangerous for the old and infirm

more cleaning of paths - especially alleys

stop poor parking in the High Street and miss use of disabled badges

new road joining the roundabout south of natures way to take traffic east of the town avoiding the High Street

existing speed limits and footpath laws are adequate but are not enforced:- once again this is down to almost total lack of police presence

2c - a speed limit on Hillfield Road should be applied also Seal Road. 2e - parish and district have powers to ensure such 2f - some footpath surfaces poor

bridle ways

pot holes are exceptionally prevalent - Seal Road and the beginning of West Street into Crablands - overloaded by West Sands traffic and heavy gravel lorries for beach restoration

lots of paths uneven, pot holes in roads - not very good at all

Selsey pavements are not even . Very dangerous for walking along or pushchairs etc

paths in Selsey are in a terrible state

## Any further comments you have on Roads and Paths?

most of the roads in Selsey are in an appalling condition, with bad surfaces caused by badly completed works to services i.e. electricity, phones and drains

on the B2145 since I have been here there have been at least 7, 2 car crashes where people fail to stick to the 30 limits in the built up areas

foot paths in East Beach area i.e. Roundstone Way - Harcourt need resurfacing - safer to walk in the road

A few years ago the cul-de-sac North Road was re-surfaced. East Street, which is very busy is a disgrace and should be re-surfaced as a matter of urgency

Same as 2b. Except again attention to detail. Filled in holes in Grove Road which then became bumps!! One big hole that was missed repaired 4 weeks later. Again who checks the workmanship!!

the pavement on the south side of Beach Road. From the clockhouse to Holford Green is uneven with large pools of water when it rains

2c - yes to 20mph. Pot holes

condition of the road has got worse since the gas company works. The number of speed changes are only causing traffic hold-ups. A constant speed of 30mph with police attendance would keep traffic moving

there are not enough good dropped kerbs for buggy users and pram pushers - there are too many potholes not repaired on the roads

2d - restaurant frontages in parts of Selsey are sometimes very dirty, also slippery and a danger to the old. 2f - more discipline as regards dog dirt on pavements. Discipline needed. Dennys Close area going into Selsey. Also playing fields

2c - some roads need speed limits like the road near the Bill pub past Whitewaves. 2e - some people like elderly people cant or cant afford to have someone to do it, so I'm not sure

road / pavement sweeping should be done by council staff

quite often holes and dips in paths and road left too long before being done. I must say grass verges are cut good and frequently. Pity about not removing grass. Never looks finished

finer in place for dog fouling and vomiting etc if caught

both need attention particularly for shoppers also side roads are holed

ever appearing pot holes to be filled in and a crossing at Selsey Centre

more dog waste bins (very good but more would help)

More policing of the roads especially for those who race up and down all night, who cause unnecessary accidents

Tree prunings, dogs mess, and rubbish left Fisherman Walk

I thought householders were responsible for the upkeep of their hedges and trees anyway

crossing in Manor Road with Church Road and East Beach Road should be a small roundabout. Footpaths need maintenance - path between Sunnymead Drive and back of James Street - paths from sea front up to Fishermans Walk

High Street could be 20mph zone

The parade metal grill path and road be repaired. The hole outside new Martlet flats and shops the slopping of red brick riles from Barclays to Somerfields

2c - no to this because there are so many who ignore 30mph and would also ignore 20mph

after we have solved some of the major problems. You will have claims that the Chichester routes are dangerous. The roads are inanimate. Not so! What makes them dangerous is the pratts who use them. Good drivers adjust to the road conditions it seems to me that WSCC is only concerned with the upkeep or roads etc in Chichester (i.e. £500,000 improvement of East Gate Sq) and does not maintain any roads in Selsey to an acceptable standard

2d - they pay rates for this 2f - the side roads are never swept or cleaned. How about the town council having another go at taking over this service from CDC

there are many potholes in the roads, i.e. Beach Road, Manor Road - especially round East Beach area

not everyone is fit enough or wealthy enough o employ gardeners

the paths are so bad that people that use motorised trolleys ride in the road

dog fouling on grass verges more signs to tell them it is illegal and a mess

most of the paths especially in the High Street are very uneven + lots of roads

prosecute dog walkers who leave dog mess

dog patrols to ensure, fouling is cleaned by the owners

how can we have a 'b' road in the condition of the B2145 serving a town

## Any further comments you have on Roads and Paths?

Warner Lane, I would like to see the short stretch of footpath alongside West Mount caravan park being paved and the path extended to the junction with paddock lane

far too many HGV using B2145, but this will never be stopped because of Natures Way and who owns it. This company should be held responsible for repairs

B2145 has too many potholes

enforce anti littering and chewing gum disposal more strictly

2d - if it was me I would - presentation. 2f - people cycling on the paths. Apart from that they are good

lots of roads in Selsey are poorly maintained

more cycle paths. West Street always floods and pedestrians get splashed by traffic. Enforce dog owners to clean up

the hedges n the corner of Wellington Gardens and the High Street should be cut, they snag your trousers, stockings etc and it is almost impossible to walk on the pavement. PS Please stop people parking on grass verges, most have big enough drives to park in

try to stop dog owners letting their dogs poo on the grass verges and then not picking it up

I live in North Road - 25A. After heavy rain a huge puddle gathers by my drive. The soakaway is some yards further along and doesn't clear the water quickly

crackdown needed on dog mess. Cut down on people parking on grass verges and paths

more doggy bins

more facility on kerbs for wheelchairs. Not such an extreme camber into the road on the pavement in East Street, it is quite scary when riding in a buggy

footpaths could be better kept and please keep focus on more cycleways to allow locals and visitors best access to our town and countryside with need of a car

the paths are too narrow in places

would like to see more cycle paths and less pot holes in the B2145

grass verges adjacent to pavements are poorly maintained and dog fouled. If they can't be looked after, pave them over to provide broader footpaths

footpaths need resurfacing

all the Langmead traffic do terrific damage to the roads

if traffic kept to 30mph instead of what they choose would be fine. Also more effort on stopping people parking on double yellow lines please

the road is too narrow and winding for the increasing amount of traffic - if there were a way of reducing traffic, especially huge trucks, I'd welcome it

most of Selseys roads are in very bad shape with potholes and dips. It is time for the unadopted roads to be brought up to standard and taken over by the council. Why are we left out?

car parking on pavements should be prohibited as it obstructs prams, wheel chairs etc

improvements needed in Manor Road, the pavements

2d - why New York? When I worked at a village shop every Monday morning I swept a carrier bag of rubbish of the frontage and cleaned up pavement and door area of sick etc. 2f - the pathway between the butchers and solicitors into Horsefield has children and others eating fast food and drinking and leaving containers and smashing bottles, mainly Sat & Fri night. Why is there nothing done about it? Also no bin for dog waste. This path is used as a dog loo. Why is there no waste bin in the middle and end of path??? I know from a local resident that the litter bins was removed because some local had put their own litter in it. So why take it away to punish everyone else? Maybe if the bin was replaced maybe the blockheads that use that path might use the bin.

pot holes need more urgent attention

deft potholes at junction of Constable Drive and Beach Road. Deep potholes on Manor Road, between Beach Rd and Selsey Centre

some of the roads are full of patches and potholes and parking on some roads is downright dangerous, especially Manor Road and High St and East St

unprintable

regular commitment to repair road and paths over a 20 year plan to bring them all up to standard

there ought to be more of an effort to keep all of the road clean in Selsey and more traffic wardens plus enforced fine for people who leave dog mess on the road

### **Any further comments you have on Roads and Paths?**

more traffic wardens to enforce penalties for people parking in ridiculous place i.e. over driveways and on yellow lines etc

maintenance of surfaces to a safe standard especially important re young and elderly

better cycle tracks on B2145

better cycle paths leaving road for vehicles making cyclist safer would encourage more cyclists which is healthier and more environmentally friendly

Seal Road should become public at public expense

more signs and bins to encourage people to dispose of litter responsibly

generally pot holes in roads

Manor Road from new roundabout through Grafton Road is a race track. Something should be done

traffic light sequence for turning right into car park by Fire Station - traffic from Chi turn right 1st? Difficulty crossing road - no footpath - when car parked at football ground. Also - cars parked on pavement and double yellow lines

2d - unless there was more respect from litter louts. 2e - should also apply to farmers on the B2145. 2f - junction priorities Manor Road, Grafton Road, East Street need to be changed back. Proper resurfacing on major roads i.e. High Street, Manor Road (all), East Street, Church Road, Beach Road

drivers in Selsey are mostly considerate but on many occasions cars race through the High Street with music blaring, a nightmare. At times we are slowed to 5mph by disabled scooters, preferable

what we do not want are road humps. They damage the car and the road surface on either side wears out fast. We have experience of the obnoxious hazard from living in Kingston

cars parked on paths

the verges would benefit from more regular cutting on the entrance to the village

too much heavy traffic

too much bad parking. Too much pavement cycling and ignoring red lights

not wheelchair friendly

more foot paths and street lighting between Hunston and Selsey

more trees along the roads / paths - aesthetics and environment

paths outside One-stop dreadful. Seal Road needs proper surfacing - also High Street and Grove Road

2c - not a blanket ban but more roads should have it. 2e - but sensitivity would need to be applied as it is not always easy for all householders to do this. 2f - I would be useful to set up a scheme whereby volunteers who regularly walk footpaths in the parish report any problems to the council. I have often noticed problems with signage and the accessibility of paths outside the urban area

the road that leads from town centre at the back of playing field on to school lane double lines need to be at the end (not near road) as at present school children are often at risk on the pavement by cars speeding to kerbside. It an accident waiting to happen

the path by one stop is dreadful

cycle route around Selsey and around Manhood Peninsula - link Selsey directly to Bracklesham Bay

yes they are all in need of repair. The roads have huge pot holes in them and the footpaths are a hazard to pedestrians

to many pot holes very dangerous

paths need repair, they are uneven and poorly surfaced particularly in the village centre. Shopkeepers should not be allowed to display outside their shops it is both dangerous and unsightly

sleeping policeman to slow boy racers on Hillfield Road.

I also have a buggy and find pavements difficult in places. I cannot get on a bus

20 mph speed limit is good but only if it can be successfully enforced

why should shop keepers have to sweep their frontage, when they, like the rest of us, pay extortionate council tax for this sort of thing (road sweepers with brooms etc) to be done

far too many weeds on pathways and the gutters in most of the roads a weed killer spray could help contain this. Large potholes by East Beach shopping parade been there for ages

dangerous corner on Ferry Bend, Dangerous parking - St Peters Church and adjacent roads

the only path I would like to be kept clear is the footpaths along the seafront as I cannot walk there in the winter because of the stones

## Any further comments you have on Roads and Paths?

fill in pot holes

is there any point to this survey. I expect nothing will happen to our roads or paths or anything

in general better than many major routes

use some of the large kerbing to use for pull in parking i.e. East Beach Rd. This would save lots of bother when exiting East Street (Fisherman's Joy) towards High St cannot see road because of parked vehicles

very poor

more maintenance

they are all in a terrible state, Manor Road, Grove Road, Coxes Road, the road and foot ways in the Parade are disastrous and very dangerous

quite a few pathways are dangerous to pedestrians and for disabled buggies. Quite a few roads have serious pot holes

the roads are disgusting, urgent repairs needed now

more traffic wardens, doing their job. Pavements need lots of attention. Need more street cleaning, esp. gutters. Weeding etc

the dustmen empty the bins then for an extra 1 inch of the drive leave them in the middle of the pavement

very poor quality. Many path edges at the road do not have a slope. Difficult for buggy wheelchair uses

2c - who would police it? 2d - We're not New York anyway, who needs it? 2e - it's the law now or hadn't you noticed? 2f - replace the worn-out pink and grey with good tarmac

too many of our local roads and the B2145 are broken, pot holed, and in places dangerous. Ad hoc patching by the authorities don't last long and not comprehensive they often have to return within 2-4 weeks after just doing the most sever pot holes. And leaving the small (6 - 12 ") ones to get worse before doing anything to them - why?

the biggest fault is near the East Beach shops roundabout. Roundstone Way and Beach Rd near the sea are poor

level paths to be created around peninsula to enable disabled access between Hillfield Rd (past Grafton Rd which has 2 - 3' drop) to East Beach

many roads have terrible pot holes which are in need of repair

they should be stricter control of dog walkers clearing up their dogs mess I am a dog owner and always clean my dogs mess up, the people who don't should be ashamed of themselves

2d - town council should. 2f - foot path at the back of James Street, from pub to top of James Street - needs more light and maintenance

would like to have a footpath on B2145 from Park Lane to Manor Road

I use a road buggy round the Listening Post and the so called repairs to a busy road are appalling and a greater hazard to a disabled person very dangerous. Also top of Beach Road going Church Road need some better planning or lights

cars parking partly on pavements parking on double yellow lines in High Street

if B2145 is improved to any extent it will give rise to more developments in Selsey

cars parked on grassed area are making area look very down i.e. Manor Road

I help to run a blind club in Selsey. 2e is a very sore subject to the blind

pot holes should be dealt with quicker

B2145 is a terrible road, but 90% of blame is the fools who drive it

potholes should be filled in not be left to get (Pye Park) bigger

some roads would benefit from speed humps - Manor Lane! Drivers reach very high speeds towards Drift Road. Would like roundabout at junction of Beach Road and Manor Road

regular checks on uneven paving and a quick response to correcting it

excess dog mess on the grass verges Old Farm Road needs to be cleared and stopped. Dog owners should be held responsible and their dogs destroyed if they do not comply

roads and paths are uneven and poorly maintained in certain parts

The Selsey roads are a disgrace, pot holes everywhere

paths very uneven, liable to trip anyone with leg problems

state of roads is poor - many potholes which should be repaired properly as when they are just filled in they are back in a few weeks

far too many potholes and deep ones. Sloping pavements need levelling. Church Road needs speed camera at the bottom

## Any further comments you have on Roads and Paths?

fill in holes

side roads in Selsey have more pot holes and breakups increasing each year. Seal Road looking pathetic near pub

plan works better. Give information regarding forthcoming works as you leave Selsey. Stop using poor contractors -(I have worked in Highways Depts and I would never use people who do such poor work)

maintain paths where they are up

Main access roads (i.e. Beach Road and Manor Road) should not be allowed to have cars parked on the side of road. The old Stargazer junction (new access road to new roundabout) should now be a roundabout

fill holes in

some roads used as race track

there is a railing at the bus stop near the garage which has been hit and has yet to be repaired. Bus stop - where shrubbery is involved needs regularly cutting back

road and paths in poor condition

numerous potholes - need more 'pothole' patrols by WSCC

poor pavement condition. poor road surfaces

2d - local authorities should do it. 2f - Double yellow lines right up to Albion Road from Kingsway both sides as large vehicles, buses etc find it hard to turn. An accident waiting to happen. Paths uneven. Road very poor, especially at the edges dangerous for cyclists

dangerous potholes are not dealt with quickly enough

Hillfield Road footpath on left going towards the sea is badly in need of repair as far as the Bridgeway, and quite dangerous for the elderly, in places

stop the parking in the High Street, posts put on the pavement outside Lloyds Chemist and the computer shop to stop cars parking on the forecourt, someone is going to be knocked down one day. Roads and paths should be repaired more often

The drain in Lewis Rd by Box Rocks very bad. The pot holes around Selsey to be made up

would the council be prepared to offer the hedge cutting service to those who are elderly or infirm

the worst I've seen

try sitting in a wheelchair and being pushed around Selsey. It's a nightmare and very painful

more pavements and paths

many potholes in the East Beach junction with Constable Rd area

some of the paths are very uneven

2d - could lead to problems - if someone falls they might blame the shopkeeper

2d - fast food / take away outlets should be responsible for keeping their frontages clean. 2f - many paths in Selsey are in poor condition - danger to the elderly - especially south side of East Street

more posts / stands to secure bicycle when not in use in town

better drainage on footpaths (some) and some roads

holes in road and paths to be filled more quickly when they appear

2d - within reason. 2f - overhanging hedges and trees is a menace all over. There should be some overseeing by someone (possibly community wardens on their walks) who report such and then warning notices sent to residents to clean the offending overhang on the public footway or be fined or charged for the council to do same

pot holes, mud from Natures Way

too many pot holes in the roads. Paths ok

I would like to see sleeping policemen put along Manor Rd and also Hillfield Rd, to stop speeding there

speed cameras more controlled pedestrian crossings

a lot of paths are uneven. This needs to be rectified before someone falls and sues the council

resurfacing on most Selsey Roads

traffic calming schemes on roads such as Manor Road etc

disgusting

### **Any further comments you have on Roads and Paths?**

pavements and paths are disgusting - a great danger to the many elderly and partially sighted who cannot see all the cracks and ruts

road sweeper would be an advantage and path cleaner i.e. edges more waste bins and dog bins

lots of pot holes

many pot holes need attention

the roads generally are getting into a dreadful state and should be far better maintained

fill in potholes whether private roads or not (less accidents)

organised assistance for pensioners regarding 2e

to temporarily fill pot holes and not leave them to get worse. Manor Road is particularly bad at the moment

too many potholes in roads

when will the dangerous crossroads at Manor Road / East Beach be made safe

on the path that runs from Ellis Sq to Manor Lane. You have stopped cars from going thru here now but what stops the children from running straight into the road. There is no path on the industrial side of Manor Lane so every one has to step into the road. Why?

20mph speed limit would be ideal if it could be enforced

2d is a nice idea but what about disputed frontages and empty shops

they all need resurfacing

paths inadequately maintained. Kerbs broken. Weeds covering paths. Rubbish left to rot. Shopping end of 'Riviera' badly kept - path with kerbstones missing. Brings down area

residents should be encouraged to have pride in their district and not only confine themselves to a tidy garden but the road outside of their property and clear up litter etc

2e - plenty of them overhanging. 2f - too many lorries and cars in and out of Selsey. Too fast, lorries are left hand drive making it dangerous to see on bends

the verges at the top of Manor and onto Chichester Rd are left to grow far too high in the summer months. The look is one of neglect. The weeds are sometimes 2ft high

improve the pavements throughout Selsey, a lot are in a bad state

paths in many places are very uneven

better road and pavement surface - no potholes in roads and pushing a wheelchair on some pavements very difficult when no level

I think more should be done to deter litter dropping and encourage the picking up of litter

there are too many potholes in Selsey's roads

they are full of pot holes

well having to ride a bike through the village and spend more time in potholes than on the road it was not like this when I was a girl

ensure people do not park on double yellow lines on main High Street

all need upgrading

road surfaces pretty poor e.g. East Road, High Street, Manor Road and also the new road past the Selsey Centre

the footpaths in Horsefield Road are in a perilous state, particularly from Paddock Lane to no 7. Also the roads have been damaged. The entrance to the craughs is heavily cratered too. Re Horsefield Road there is no disabled access for house 16 - 34

1. Manor Road widened to remove parking on road. 2. Parking on Manor Road to be one side only. 3. Not parking on double yellow lines to be enforced. 4. Manor Road / Church Road junction needs lights or roundabout

pot holes in many roads especially Manor Road and East Beach Road

dogs fouling on paths - owners should be fined

you wouldn't think that Selsey paid anything to local authority road upkeep as all around town are awful

there is a problem with disabled scooters as they are very fast when on paths, they should be made to travel on the slow switch when in the town

footpaths should be kept clear by council. Repairs to services, pot holes etc should be co-ordinated to reduce interruptions

## Any further comments you have on Roads and Paths?

2d - unjust unless supported by over-all clampdown on casual litter

resurfacing needed

I fell in the middle of the road by East Beach shops where there is a large hole surely these should be repaired and checked

a roundabout is badly needed Church Road / Manor Road / Beach Road

the council should sweep roads and paths

lack of crossings for elderly people to cross the roads leading to the town, East Beach etc - should be light controlled

lorries should be limited by size

pot holes need to be filled in as soon as they get too big. Paths could be widened in places. Selsey / Chichester road made wider to accommodate the huge lorries

stop parking on grass verges

more attention needed to bad surfaces and potholes

resurface Constable Drive and East Beach Road corner

footpaths in East Beach area are very poor

should consider placing a speed camera outside of Selsey Police Station

regular total inspection and maintenance to repair surfaces especially pot holes in all areas

2e - the charm of Selsey would be lost

ban cyclists on pavements. They are dangerous, discourteous and travel much too fast. Never see any police about to deal with them on the spot

we feel there should be more dog poop boxes and special cycle routes or let cyclists ride on footpaths plus tractors should pull over and not hold up traffic for mile after mile

cyclists should be fined for using paths and school children educated in safe way of cycling

many concrete roads are past their best and want terracing - especially around East Beach area

most side roads are full of pot holes, they need reinstating to a safe condition, make residents cut back their hedges to their boundaries

path from High Street to Paddocks Lane is a dogs toilet

pavements in very bad condition, with pot holes and trip hazards

too many big potholes everywhere

Outside Lloyds Chemist it states no parking and yet it is always full of cars. Nothing is ever done about it

an enforceable 20mph near schools. The large number of cracks and potholes on the roads need repairing. A drive around the streets will show many holes

paths could be relaid and some roads. Especially on 51 bus route, Merryfield Drive area

the B2145 was never built for the amount of heavy traffic that uses it now. We need a new road that can take the articulated lorries, heavy good lorries and tractors

the traffic through Kingsway has increased as has the speed in which they travel

Croft Road still not made up and taken over by the council. My section has no street lights, no drainage, no grass cutting, although I still pay same community charge

I find some paths uneven and I have gone over more than once

repair potholes

2d - It would be a nice idea if shopkeepers did keep their frontage clean (regardless of what New York does!) However if you are already paying extortionate rates... 2e - telephone numbers should be readily available for the general public to get action on householders who do not prune and keep their gardens in order. I have seen many instances just recently where overgrown plants/shrubs are so hazardous to the point of being a danger to the public. 2f - although I don't believe a blanket 20mph speed limit should be imposed, I believe there should be more control of speed freaks! There are a number of boy racer types in Selsey which never seem to be bought to book!

stop cars parking 1/2 on 1/2 off foot paths and cyclists riding on them. This causes problems for pushchairs, wheelchairs and the visually impaired

lots of dips in some roads eg Seal Road. Need more street lamps on West side of Selsey

enforce existing speed limits and parking. Make a proper road surface from the south end of Croft Road

## Any further comments you have on Roads and Paths?

road into Selsey having road humps to slow down drivers, from St Peters Church to Medmerry School

street lighting is a joke. I have rung the department every month since August 2006 - there are still no street lights working on the north side of Church Road, Selsey

dog owners to be heavily fined if the mess is not picked up

the potholes filled in better. People putting their bins off the path after emptying. Stop people parking on double yellow lines everywhere

invest in more cycle routes so people don't have to use their cars, to make us all a bit 'greener'

making a cycle path to Chichester

fed up with mud and potholes made by tractors on road

people with hedges overlapping pavements should keep them cut, as pushchairs or mobility chairs cannot get by

keep parking off the High Street instead of park and shop, even if they have a disabled sticker

the East Beach coastal path is illegally used by numerous cyclists and motor cyclists. More notices banning this practice could be erected and also additional visits by the community wardens would help

some side roads are full of potholes, some dangerous

Selsey road surface problems need to be addressed. They do not compare favourably with condition of the roads surrounding West and East Wittering or Bracklesham

Mill Lane needs improved street lighting. Gutter drains (gulleys) need more regular cleaning out and footpaths should be extended to the Windmill

DOG POO everywhere. It is a disgrace. Church Road - the grassed area on 'odd numbered' side should be removed and possible allocated parking to 'even numbers' be given. This road is dangerous - even though a lot of traffic comes via Pye development now

on Manor Road (from Selsey Centre) needs new road surfaces or repairs due to excessive volume of fast traffic tearing up the road

2c - 20mph in the High Street if it could be enforced

Pavements in Selsey are awful in all areas - local roads badly pot holed

REPAIR THE POTHOLES IN Lingfield road

any hedges, bushes and plants I have found a nuisance. The dry twigs and branches catch on ones clothes and face. Also the shingle that spreads from driveways onto the pavement can cause sprained ankles and even falls when trodden on

2c - Shopping centre only. 2d - providing they get a reduction in rates for doing so. 2e - definitely. 2f - many many rough areas / potholes, especially Constable Drive / Beach Road junction, and Grove Road, not enough expenditure

Police to look out for non taxed and illegally parked cars

the footpaths are a dangerous place for pedestrians;. Due to the abuse by cyclists of all ages my wife has been injured twice by cyclists coming from behind at speed. The law on this should be enforced

the paths in Selsey generally need updating as do the local roads in Selsey, they are dangerous whilst out walking

the side roads are as bad as the main road in some areas. Full of patches and potholes

existing speed limits of 30mph need to be enforced eg Beach Road

they should be better looked after

overhanging hedges should be cut and billed to householder, after 1 warning, if ignored

I think speed limits should be enforced in the High Street. I have witnessed large lorries speeding very near the pavements. Its very dangerous for children and the aged

the highways agency are very slow at repairing the many dangerous potholes in the area, ie the potholes close to the new Selsey Centre and Albion Road, it is also time the West Sussex County Council took over some of the unadopted roads in Selsey, many of the roads carry large volumes of traffic from increased house building in Selsey and its totally unfair for residents in these roads to have to foot repair bills

a 20 mph limit mean burning more fuel, thus more pollution. Just enforce the 30 mph limit

entry to Mnor Farm Close - both the road and pavements need improving. Pavements very narrow near town hall

corner of Latham Road should have pavement not a mud path

absolute disgrace and downright dangerous

sort all potholes out down Manor Road by Pye

## Any further comments you have on Roads and Paths?

East St / Grafton Rd / Manor Rd junction should be changed back to give East Street priority to slow down the traffic and also to give a better view when crossing the junction

repairing potholes - especially in front of One Stop / Riviera section

repair paths and potholes in roads, don't patch, doesn't work. More yellow lines and enforce illegal parking

there's a lot of potholes about everywhere in Selsey

need more regular cleaning. High Street double yellow line area needs policing, the parking fines could pay for the cleaning

shop owners, such as Box Rocks, should be made to clear the rubbish left by their customers - not just their shop frontages.

Regular cleaning - policing for parking in High Street on double yellow lines

when in good order maintain them, don't let them get bad. Stop parking on pavement

to make the pavement wider the hedges and rubbish should be pruned back hard and cleared along School Lane and there should be no parking along any part of School Lane. The road and parking in New Parade redesigned for better access and parking and removal of area in front of riviera restaurant

paths in poor condition

people particularly children, drop litter everywhere without a thought. Some sort of campaign to enlighten them on responsibility would be good, both from parents and schools. Dog poo is as always a major bug bear, particularly on the sea path

2e - mainly if its on the main road, but at the end of the day its up to them

we need speed humps Beach Road / Kingsway. We've seen 1 cat killed, 3 car wrecks into lamp posts and telegraph poles, 1 van written off and 2 cars damaged in 18 months

foot paths uneven and in need of repair

more bins for dog mess. 20mph limit or speed restrictions at start of West Street

East St footpaths have not been tarmaced from the year dot; stones showing. Parking on grass verges creating poor visibility for pulling out from drives in Manor Road

the potholes and raised paving slabs should be checked and repaired frequently

more adoption of private roads

virtually all roads and paths in Selsey are in a deplorable state

overhanging hedges are a particular problem in Sidlesham

20mph speed limit outside schools - temporary. Go and look at Aldingbourne

too many potholes at kerb edge

Seal Road is a disgrace with many potholes

repairs to roads and paths. When pot holes are repaired by ? Holes not cut out sealed and tarmaced in correctly. Most repairs fall out next day

a dog bin should be placed in East Street approaching Seal school from High Street

should be cleaned more, as always broken bottles, dogs much everywhere

if shop keeps look after own frontage, there should be good back up with general street cleaning, with strong litter control

2c - but try enforcing the 30mph limit. You've got CCTV. 2d - but try monitoring and prosecuting litterers. You've got CCTV. 2e - within reasonable limits. 2f - Road surfaces generally are pretty poor everywhere, even on new roads such as the extension to Manor Road to the Pyefield roundabout. The area around the East Beach shops for example appears to be just one big pothole - with random bits of tarmac shovelled into it

Public footpaths should be cut back as they are unpassable at times. (linking Kingsway to Merryfield)

the amount of dog mess on pavements and parks is horrendous

in return for council tax reduction

paths generally good, road conditions terrible

not adequate for the large vehicles using it

no parking on grass

have seen shopkeepers sweeping, so don't really see it as a problem. Alleyways are definitely overgrown in places

stop parking on double yellow lines - maybe hanging baskets on poles (similar to Bognor) - create a more continental feel in High Street

## Any further comments you have on Roads and Paths?

the car park in East Street when exiting, the road to the right (highest side) is obstructed by greenery, making you pull well out into the road

2c - 25mph maybe in the shopping areas - not elsewhere

East Street; abuse of the green at Fishermans Walk for parking and now dangerous through traffic over green - bollards removed should be re-erected

re 2e - hedges should not be trimmed back provided the overhang is 6'6 or 2 metres in height. Re 2c - 20mph in the High Street ok

East Beach shopping area parking is dangerous. Should park along kerb and not into kerb. Enlarge parking area by shops in Marisfield Place

Manor Road is in need of repair and Seal Road, too many pot holes, also Paddock Lane is very bad, my sone punctured his wheel but the wheel had to be replaced it was so bad

mend potholes in roads

please stop the speeding along Grafton and Manor Roads especially Friday and Saturday nights. Where are Police?

2c - but who will police it. Can't even control 30mph. 2d - shop keepers already pay a high business rate and this facility should be included. 2f - the paths and roads in general are in a poor state, but I believe this is the Districts problem

yes, they are mostly uneven and very difficult to walk on

2c - enforce existing limit 2d - no not unless a business rate offset is allowed. 2e - enforce existing requirements. 2f - many footways all through the 'village' are poorly maintained and unsafe for pedestrians of any age

the constant road works over nearly a year between Hunston and Sidlesham?

Dogs poo - A licence should be obtained to own a dog - the money could be used to put wardens on our parks to ensure any faeces is disposed of properly

pot holes need repairing on roads

2d - what do they pay rates for? 2f - Junction at Church Road / Manor Road is dangerous, especially when coming from Chichester

restriction on large vehicles using Paddock Lane, causing deep ruts and broken edges (Southern section)

some (quite a few) roads need resurfacing and are in a very poor state

In the 10 years we've lived here the number of lorries coming to the farm in Selsey has more than doubled

B2145 isw a dangerous road especially with heavy lorries - cyclists in particular are in danger

2d - if its their own rubbish yes. 2e - overhanging hedges can be dangerous. All footpaths should be checked

the roads and paths in Selsey are a disgrace, full of potholes, what are our taxes and road tax spent on?

2c - 20 mph around Seal and Medmerry schools. Many car drivers in Selsey fail to adhere to the 30mph limit regularly. How would a 20mph blanket limit be policed? The average speed around East Beach is 50+

paths in very poor condition - (electric buggy - impossible to use on some paths limits accessibility)

some paths in poor state of repair

Road conditions in Selsey absolute disgrace probably worst in country. Paths not much better

High Street - unsightly. Generally - untidy and too much dog poo

2e - elderly or ill people may not be able to do this, so definitely no. 2f - vandals causing damage to properties. Broken glass on paths and roads particularly in side streets, also around pillar box by Fishermans Joy once during winter etc etc. often glass is there on paths for ages

more attention to road / path surfaces East Beach area

we need cycle paths from Selsey and in Selsey

I have lived here since 1984 and have not known the pavement outside my house to be redone once in all those years

both public and private highways should be maintained to adequate safety levels

I thought that householders having to keep the hedges trimmed etc was a regulation anyway. There must be more policing of parking in High Street / parking on double yellow lines. The situation is absurd

Manor Road between Beech Road and the Selsey Centre. Although repairs keep being carried out more holes keep appearing and where the road keeps breaking up large lumps of tar etc have been left and as the cars etc go by a number of the debris flings up and nearly misses a number of pedestrians

very uneven surfaces actually different. Shop keepers spreading over and hoarding on foot path even chairs

## Any further comments you have on Roads and Paths?

the roads in Selsey are atrocious with pot holes everywhere. We car drivers feel what it is doing to our cars. It is disgusting.

Why do we pay

Should be a roundabout at junction of East Street and Grafton Road, there are a lot of near misses here. The roads should have cycle tracks alongside them.

but cannot see drivers taking any notice. Most of Selsey has a 30mph limit now but no notice is taken. Hedges should be cut behing the edge of the property as a years growth will take them beyond the edge

uneven pavements. Potholes in road

mini roundabout at the crossroads by the Fishermans Joy

many roads unsafe for cars and pedestrians due to potholes, broken verges, no pavements etc. too many cars parked on

double yellow lines in High Street - no legal enforcement

harsher regulations regarding 'dog fouling' - on paths, roads, sea wall and beach also green areas. Selsey is like a huge dog toilet

2d - very unfair on small businesses with mininum staff, at least the public could see something more visible for their counce tax expenses if WSCC or CDC took this on. 2e - Surely this is already dealt with by WSCC. What are they doing to implement existing responsibilities that they have. 2f - condition of both roads and paths leaves a great deal to be desired, potholes . Sunken verges where rain water lies and the public get spashed by inconsiderate drivers - cracked and misaligned pavements and paving slabs Hillfield Road, immediately south of the Tandoori Reastaurant on the east side of Hillfield. The actual condition of both the B2145 and roads within Selsey is very poor. The incidence of speeding in areas where care is needed is increasing. Bad areas I have noted are Hillfield Road, Manor Road and East Street. I suppose Church Road could be another long straight road affected / hence the notion of chicanes. I've even seen it happening in the shopping area of High St. The incidence of drivers shooting the pedestrian crossing in High St is also increasing, even when it's quite clear that pedestrians are waiting to cross. Sooner or later there will be an accident there. Traffic lights - if so to help the buses how about a one-way system to include Grafton Road / Seal Rd. To forbid High Street to buses altogether is out - else shoppers would never get shopp to eg East Beach having visited High Street to buy provisions locally, as distinct from going to Chichester

2c - but would need to be enforced, especially the youngsters speeding. 2f - pavement surfaces should be maintained, so that elderly can walk without tripping over

the 30mph can't be enforced, so what chance for introducing 20mph

2c - who would enforce 20mph speed limit? The 30mph limit isn't. 2d - insurance implication. 2e - but who enforces this?

2f - Potholes need urgent attention almost everywhere

the sea wall walk was very badley cleared after the rough seas. Still lots of pebbles under the seats between Pagham and the Lifeboat Station

charge for more than one car per household using the roads as regular parking. People with garages and drives should be asked to use them rather than parking on the roads. Work vans etc should not park in residential areas - work site parking should be the norm

all roads and footpaths need doing including the waste of space footpaths in the High Street. Double red lines outside all of the shops in the High Street

street cleaning is poor. Colt Street , Old Farm Road as examples

traffic warden needed especially for the High Street

Junction at Church Road, Manor Road and Beach Road very very very dangerous for all pedestrians and car users. Needs looking at urgently

WECC to deal promptly with all potholes, ditto responsible fraontages on private roads eg Seal Road

dedicated cycleway the entire length of the peninsula, to keep cyclists separate from traffic and encourage cycling

clamp down on cars who park on double yellow lines and on pavements necessitating pedestrians to walk in the road. This happens daily in McNair Close

hedges height should be restricted as governed by deed of property. Off road cycle path essential from Selsey to join Pagham Nature reserve

too many potholes - cycle lane wanted (off road)

2e - this might prove difficult for some older folk. 2f - repair should be made as and where required - potholes etc

2d - prize for best shop frontage, name/shame worst. 2e - not practical for old and infirm

people should be expected to park cars in their own grounds, if they have them. Paying for parking spaces on the road outside of houses should be considered. Works vehicles should not be parked by private properties but should be lodged at respective depot and work places

if people don't trim their hedges to their boundary they should be fined

## Any further comments you have on Roads and Paths?

2d - my parents were shopkeepers here in Selsey 40 years ago and they always kept their frontages clean, thought that was a given. 2f - Manor Road over to Grafton Road a race track, the priorities should never have changed from East St down. Needed traffic lights there. Car drivers parking on pavements etc anywhere but in the car parks or on their drive ways or just plain ignorant, too lazy to bother parking sensibly or legally

people drive too fast, doesn't need to go down to 20mph but stick to 30mph

get the dog muck off our paths

the state of many roads in Selsey is appalling, with many potholes. Better police enforcement of parking on double yellow lines in High Street. We don't need a 20mph limit, just better enforcement of the current limits

dirt left on roads by tractors is dangerous. Fly tipping - increased since 'refuse collection' reduced

a lot of footpaths are in a very poor state

2d - nice idea but if shop owners don't do it, could lead to a real problem with litter etc in the High Street. 2f - Manor Road - currently traffic is too fast and its unsafe due to park, leisure centre and nursery. Needs a proper pedestrian crossing by the leisure centre

it would be nice if something was done

pot holes in Selsey roads are a danger to all. More so bike users

the pot holes in the roads need filling in with a better quality filler

comments on the condition of paths. Could go on for ever. I would like to see the person who decreed the surface of East St walk bare foot on the pavement the whole length of it. Delicious. I always feel as though I am walking on a bed of nails. It really is a disgrace

due to expansion of Selsey we are in need of a second route in

too many potholes

no parking on grass verges

stop allowing cars to park on grass verges which ruin them

they should build a cycle path into Chichester as the road is very dangerous to cycle on

build another road

the hedges can be over the edges but not really bad

smoother roads

wider footpaths

drivers should be more aware of children

road works should be made a priority to get them completed, not hanging around for weeks or months

bad pot holes on road surface Church Road and East Beach Road

2d - a shop front policy would be good - the shops looked fantastic at christmas and easter so perhaps this exists in part. 2e - help to be provided to elderly or infirm. 2f - residents should not operate businesses from front gardens. Front gardens should not be completely paved over and paving should be permeable. Residents should not blanket park on kersides permanently as happens with resident of 5 Chichester Rd.

2d - shops pay tax so the council should provide road cleaning . Sweeping as they do in London

the B2145 is completely inadequate for the volume of traffic. However short of building a new road probably minor improvements can be made

the quality of the road around East Beach Shops is terrible, no sooner do you fill the holes - more appear. We need some safe cycle paths

we need many more trees, the whole lay out looks like a holiday camp

remove speed bumps going into Sidlesham as they are dangerous to motorcycles

stop so many motorbilty scooters on the road and make them all take some type of classes in road behaviour - they are a menace

roundabout at junction of Manor Rd, Church Road and Beach Road

A27 is worse than the M25

speed bumps should be used on some roads especially from Church rd roundabout to Royal British Legion - drivers leaving the Legion can only see a short distance to the right

some pavement areas are very uneven and dangerous to walk on (especially for elderly)

## Any further comments you have on Roads and Paths?

bus route between East Beach and Selsey High Street is in poor state. Patching not the answer

why do they have to put pipe lines under the road. Surely it could be done on the verges and occasionally cross the B2145 to the verge on the other side and so on

potholes in road at East Beach shops are dangerous, cars swerve to avoid them

many road repairs are left with uneven surfaces making driving very lumpy

2d - in areas like East Beach and around Riviera. 2f - paths are poor in lots of places round East Beach - (try riding an electric buggy you can nearly get thrown off). Too many ridges and holes in roads for safe bike riding again can nearly get thrown off

2c - but there are not sufficient police to do so. 2f - all roads and paths are substandard

we should take pride in our house areas. Selsey roads need fully repairing, there is so many potholes, and bumps and humps

20 mph in High Street possibly. Pot holes have appeared all over roads in and around Selsey - can something be done to improve situation

pavements need to be maintained

shopkeepers should all have clean windows and frames to their shops, clean frontages. Traffic wardens everyday please

there are some pavements that could be made safer for people to walk on without stumbling or walking through puddles eg Malthouse Raod, Manor Road etc. overflowing gutters on corner of Lewis Road making it difficult to cross road when raining. Side roads kept cleaner

many of Selseys roads have large potholes and only temporary mending. As a cyclist I find this very dangerous

repairs of and gully maintenance seem non existant

not kept to a good standard of repair

I though hedges . Trees that do overhang must be trimmed to a height of 7ft above footpath. Is there a defined height for branches overhanging the road?

The condition of the B2145 is poor. In view of the amount of traffic using this road daily, urgent and regular upkeep should be maintained

imrove path outside Box Rocks - very dangerous for unsteady individuals

If the housholders do not keep hedges trimmed council should do it and fine housholders hard

there are too many footpaths in Selsey where the hedges have taken over the paths. If housholders don't keep hedges trimmed the council should do it and charge householder

all roads and paths repaired

dogs muck on the paths, disgusting

No point in making lower limit as current limit not enforced. Stop paying lip service to High Street parking. It is dangerous

All roads and paths in Selsey need stripping and resurfacing. WSCC should put a program in place to maintain regularly and should adopt all roads within Selsey

generally satisfactory, some roads suffer from many potholes. A program of full depth resurfacing . Relaying should be considered

All roads on Manhood 40mph. Is it possible to enforce speed limits. Foot paths things to avoid: Dog poo; push chairs; prams; wheel chairs; scooters; roller boots; roller blades; bicycles; motorised wheel chairs; and people

more maintenance on roads and paths

stop parking on double yellow lines

under used footpaths shared by cyclists

Main road out of Selsey to Chichester is full of large pot holes. Manor road is like a race track - needs a speed camera

dog mess is a real problem - the children often go out for a walk and step in it, though they stay on the tarmac paths

very important that hedges should not be cut in the nesting season March - July. This would be publicised - notices in council offices and library

The paths from Hillfield Road to the High Street are in poor condition making it difficult for wheelchair users. A very different spot is from British Legion to the Council Office where there is little walking provision. Crossing to the other side of the road presents a problem since there is no pedestrian crossing until the entrance to Budgens

There is no point in having a 20mph speed limit as the present speed limit is often not adhered to

**Any further comments you have on Roads and Paths?**

---

All roads and paths approaching beach entry should have large sign stating dogs must be kept on leads at all times - for the sake of dogs that are in control on leash and the obvious problem of stepping in 'dog on the loose faeces'. How very dare the irresponsible 'shit in the head' owners maintain I am not in control of my dogs - when their shitty little bundles of fluff get in my dogs face and arse. Cute I don't think.

---

roads and paths are in a poor state. Condition of road surfaces are very poor. Parking on some roads is a hazard

---

The footpath surfaces should be improved. In places they are dangerous for old folk who use buggies

---

Selsey lacks street lighting in some areas

---

house owners should also be responsible for sweeping their own frontage, as they are in Germany and Austria. 20 mph in High Street and outside schools etc

---

wish something could be done about the dog poo on the pavements. Walking kids to school is a nightmare so its easier to use the car

---

some of our grass verges are old meadowland full of wild flowers. I would encourage people to preserve these and discourage too much mowing etc

---

we never see a road sweeper. Or gully cleaner in our road and roads are suffering weed adjacent to the kerb

---

further repair and resurfacing to be undertaken

---

2e - perhaps some assistance should be given to those physically or financially unable to do so

---

Traffic calming needed in Grafton Road / Manor Road. Double yellow lines should be painted at every junction, too much dangerous parking. Grafton / Grove now very dangerous for children to from school, cars too close to junction. Beach Road full of pot holes from Manor Road to shops

---

need for drain clearing and road sweeping on the sea end of Warner Road
